CLARESHOLM ALTA., AUGUST 12, 1915

NO. 25

EXCURSION TO SCHOOL OF AGRICULTURE A RED LETTER DAY FOR CLARESHOLM

It was a gala day for Clareasholm last Friday, when three hundred people came in from outside points between Calgary and Lethbridge on the two excursion trains which arrived here shortly after eleven o'clock. The excursionists were met at the depot by cars owned by the local citizens and transferred to the School of Agriculture, where they were greeted by principal Stephen of the School and Manager M. L. Freuge of the Demonstration Farm, and were ushered upstairs in the assembly room, where a bounteous lunch consisting of sandwiches, rolls and cheese and tea was served. Those with about three hundred more who gathered during the day from the surrounding district made a total audience of about five hundred of the most representative farmers and business men of the southern country, to take in the afternoon programme, which began about 1:30.

Without question Carley furnished the largest turnout in proportion to size of any town along with line. This delegation of all the representative business men as well as farmers of the district including the officials of the U. F. A. and directors of the Farmers' Elevator Company, were accompanied by Piper A. Durham, general blacksmith, Carley, who lived through on the train with his Scotch baggage and took several selections on the grounds in the afternoon.

With Principal Stephen in the chair the crowd assembled on the south side of the building, while the speeches were delivered from the windows.

H. A. Craig, Deputy Minister of Agriculture, introduced the provincial system of agricultural education and demonstration farms, and touched briefly on co-operative production and co-operative marketing. Superintendent Fairbairn, M. L. of the Experimental Farm at Lethbridge spoke appreciatively for the occasion, dealing particularly on the effective work that is being accomplished by the Schools of Agriculture.

The Hon. Duncan Marshall was the third speaker, and outlined fully his agricultural policy, emphasizing the necessity of increased production and the application of scientific principles to both applied agriculture and domestic science.

The Hon. C. R. Mitchell, Provincial treasurer of the province of Alberta, concluded the addresses by commending Mr. Marshall's speech and demonstration farms and Agricultural Schools. He spoke of the good results obtained at a minimum expenditure. Also of the differences of opinion of prominent men and members of the legislature on the present system when it was first introduced, but that all had come to the conclusion that this is the proper system.

The principal, who is the agronomist, then showed the excursionists over the experimental plots and spoke briefly on each phase of work. The grass plots were the first to be looked over. Mr. Stephen strongly recommended alfalfa and that it be sown in rows and cultivated. He advised Grinnell's alfalfa to be the best for Alberta and that every one should grow their own seed. Also pointed out that it is very important that the seed should be inoculated. Red clover, Alsike, sweet clover and peas should also be inoculated. Different methods were mentioned, but the culture produced at the School of Agriculture had proven very efficient. It is not certain that timothy and red clover can be successfully grown in Alberta, but from the looks of the plots and the yield as given in the table below, it certainly does very well this year. For sweet clover it may be said that it should be sown very thick and kept fine as it does not make as good feed if grown too coarse. The Bromegrass and fescue were next. For the first, too much cannot be said of the plot. One of the fescue was fortunate in not having suffered from the

hail, a more perfect crop could not be found. The following yields of grasses were obtained from the plots this year:

English Blue Grass, five tons 1200 pounds per acre, Western Rye, three tons 800 pounds per acre, Red Top, five tons four hundred pounds per acre, mixture of Western Rye, Red top, timothy, alsike, four tons 800 pounds per acre, mixture of alsike and Western Rye, four tons 100 pounds per acre, mixture of timothy, red top, Kentucky blue, White Dutch, Western Rye, Sheep fescue, orchard grass, English blue grass, three tons 1800 pounds per acre. This mixture can be recommended for a field infested with weeds; Kentucky blue, 800 pounds per acre, orchard grass, three tons 1800 pounds per acre, Bromegrass, one ton 1800 pounds per acre, white sweet clover, five tons 800 pounds per acre.

The growing of red clover, alsike and the alfalfa in rows and broadcasted on the experimental area. Excellent plots of these clovers are growing on the Experimental area.

Corn and Potatoes were the next to be seen, which were equally as good under the circumstances. The different varieties of what corn was so numerous, that we will not attempt to mention them, nor the different amounts sown per acre. The speaker informed his audience that there were no experiments, the results to be used in the school during the winter months, that they might have a use of practical knowledge as to which variety does the best and the amount to sow per acre in this district. But for general farming, the variety should be used. Mr. Stephen thought to show very forcibly upon his lecture the advantage of sowing registered seed, by pointing out that it meant the sowing of large areas of selected seed. Clareasholm is established as a registered seed center for the direction of the Canadian Seed Growers' Association. In wheat it has been found that rust and smut together cause more loss than any other, but not as much as the year mostly, but not in the country very much. It was stated that this sowing is conducive to late maturity and the growing to early maturity. Red fescue being the earliest of the varieties seen. All plots, which were certified A No. 1 were sown about the sixth to tenth of April.

The crowd was then taken to see the demonstration of which were led by the hail. Mr. Stephen here expressed himself as being in favor of the fifty-day cuts as they make the best horse feed. The Banner oats plot was the best with Abundant second, the Abundant should be grown thicker than Banner. The speaker here emphasized the fact that he believed in growing ones own seed rather than changing with his neighbor. Also to sow only hand selected seed.

The peas and barley were next seen. The peas had been badly damaged by hail a fair estimate could not be given for these crops in Southern Alberta. The timothy and clover were then seen. The speaker here expressed himself as being in favor of the fifty-day cuts as they make the best horse feed. The Banner oats plot was the best with Abundant second, the Abundant should be grown thicker than Banner. The speaker here emphasized the fact that he believed in growing ones own seed rather than changing with his neighbor. Also to sow only hand selected seed.

After the people had covered the experimental plots, Mr. S. Carley, Superintendent of Demonstration Farms, took the people over the demonstration fields, and through the buildings. Special comments were made on the efficiency and cleanliness of the dairy barn; also on the good type of Yorkshire cattle kept exclusively at the farm.

The excursionists were given at the school a butter making, blacksmithing and weed and weed seeds identification. A large number of the students who were in attendance were present and took part in these demonstrations, and each participant of these demonstration proved the efficiency of the course he had received at the Clareasholm School of Agriculture.

The North Sea Voices

O waves, that break at my feet,
What saw ye out on the deep?
Saw ye the watch-dogs of our Fleet,
That guard and never sleep?
Aye! they cleave a path of gleaming white
From rising sun till the noon of night;
Their thunders answer the stricken foe,
But many a gallant heart lies low;
Wrapt in a shroud of white sea foam
Our Mother takes the sailors home.

O wind, that ruffles the deep,
Bear ye no word of cheer
Of the hearts that vigil keep
O'er the restless waves of fear?
Aye! for they laugh at my widest breath,
And rush bright-eyed in the jaws of Death,
A cheer on their lips and hearts aflame
As tho' they loved the deadly game.
O they fight as men, as men they die,
And I wait their muttered prayers on high.

O stars, that glitter so cold,
Above all the seas tonight,
Can you from your Heaven behold
The flush of a Dawning bright?
Aye! the reek of guns still fouls the sky,
And still the pallid shades wing by;
But this is writ in the Book of Fate,
Twin Glories stand at the Empire's Gate,
Bright Victory bids the conflict cease
And find the port wide for peace.

—Henry Chappell, in the Sunday Pictorial.

After this was over it was approaching time for the special trains to leave the depot so the guests were ushered into the assembly hall where the good ladies of the town and the staff of the Agricultural School had thoughtfully prepared a second lunch of sandwiches, cake and tea. The visitors after they had partaken freely of these good things were then taken back to the depot in the automobiles, which had been so generously given over for this purpose by auto owners of our fair town. When it comes to entertaining a gathering of the kind, Clareasholm cannot be beat.

ON THE LOCAL DIAMOND

At seven thirty last Friday evening what looked at first as though would be a very exciting game of base ball was played on the local diamond between the married and the single men of the town. When time was called it took the lot of the single men to take the field. But it was not long after Reynolds had his two batters and then made the first score of the game that the sickle Amundsen changed hands. Simpson was the man up and got to second but at the end of the inning had only succeeded in reaching third base.

In the second inning Moffatt was the only man for the marrieds who had reached second. For the singles, Solby hit a two bagger and brought Stubbins and Clark home. Then Simpson managed to make another of the same kind, and let Solby in. This began to leave the batter in the rear, from which they were able to get away during the rest of the game.

The third inning Amundsen made a score on Stubbins single, this was the married men got this inning. The single men, after Hillard had a single, Walker made a nice side to third but was put out when he tried to repeat his slide at the home plate, and with Storey out at first, this gave the bats a chance to change hands.

In the fourth inning the married

men were completely shut out. This time the last lining the singles had had yet, Solby stole home and Simpson scored on Harvey's three-bagger. Then Walker made a three-bagger and let Harvey in. Walker scored on a single, and after that the married men had another chance.

In the fifth lining Amundsen tried to steal home on a three bager, but was called out by the umpire. This was the second they came to getting anything this time. But this was the big time for the single lads. Stubbins got the first score, then Clark scored on Solby's three-bagger, and Solby reached home on Harvey's single, then Harvey and Hillard scored on Walker's two bager. When McKenzie caught Stubbins' long fly the married men had another chance to make good. But failing to do anything in the sixth inning, the game was called on account of darkness, with the score of twelve to two in favor of the single men. R. E. Moffatt made a very satisfactory umpire.

The line-up was as follows:
Singles: Stubbins p. Stubbins
Walker p. Walker
Harvey p. Harvey
Simpson p. Simpson
Solby p. Solby
Clark p. Clark
Hillard p. Hillard
McKenzie p. McKenzie
Storey p. Storey
Atkinson p. Atkinson

Tuesday evening the teams with practically the same line-up met and the result was another victory for the single men by a score of five to four.

Thank Auto Owners

We, the undersigned committee wish to publicly thank the owners of automobiles, who aided in hauling the excursionists, last Friday, as a token of our appreciation, and the use of their cars in taking the crowd to the School of Agriculture from the depot and return.

J. F. REYNOLDS

GEN. HUGHES AND THE MILITIA DEPARTMENT

By H. F. G.

It is gradually dawning upon the leaders of opinion that what there is of interest in this country needs is ideas, and that the Minister of Militia might be usefully employed at home thinking up a few. Premier Borden and Sir George Grey can arrange all outstanding Canadian questions with the British Government, and that will leave Maj. Gen. Hughes free to mind his own business, which centres largely in a suite of offices on the ground floor of the West Block at Ottawa.

Obviously two cabinet ministers, which is one-eighth of the Canadian Government, can transact all the business this country has in England, so that Maj. General Hughes can safely take the next steamer and come back to his real work. The time for the Canadian War Lord to visit England is surely after Canada has done her full duty in the war and helped to bring it to a triumphant conclusion. Meanwhile, if Canada is to equip and maintain an army which will never be less than one hundred and fifty thousand men at any period of the war, Major General Hughes had plenty to keep him busy at Ottawa.

One of the greatest problems Major General Hughes has before him is re-organizing, and the country would be only too pleased to see him concentrate his best and enterprising intellect on that subject. Not a day should go by that General Hughes should not shed a new light on its difficulties. Until lately recruiting methods have been the largely in the hands of the local regimental authorities sitting under the general orders from Ottawa to get so many men by such and such a date. The local officers have done their duty nobly, but they have a right to expect more direction and inspiration from the Militia Department than they are receiving up to date. In fact, the recruiting officers must get out after the young Canadians who are not to be recruited by their performance in regard to Valerius Camp by consistent diligence at all times and regular reports, but quite as helpful to the British Empire.

It is suggested that the routine persons who carry on the Department of Militia are in constant need of a new presence like Major General Hughes, who will keep them on their toes. It is further suggested that, as organized publicity is what the recruiting movement needs, most of the regular work of the department should be reinforced by a small but competent staff of active young men, who know how publicity may be attained.

As the chief means of publicity is the printed appeal, pictures and posters, it follows that such a staff might be chosen from the newspapers of Canada, whose business is publicity. Half a dozen reporters and a couple of newspaper artists would do the recruiting movement a lot of good. They not only would produce copy for the printed appeal, but they could do the job of the militia department in "human interest" that might be worked out to the immense advantage of the British Empire. Major General Hughes has his own press agent who follows the Maj. Gen. or General's horse on the slightest provocation, but our press agent, who has no press agent, but who is not enough for the militia department. It should have a dozen press agents blowing bugle calls for King and Country.

Being in need of ideas, the militia department should seek them where ideas are to be found. It's a safe bet that almost any newspaper in Canada, no matter how small, has a dozen bright ideas to the militia department's one. That is a moderate estimate. Most people would put the proportion much higher. The intelligence department is a sub-department of the militia department, but there is not much hope in that quarter because its intelligence is diverted into other channels. What's wanted is another intelligence department which will devote itself solely to publicity.

That the place to get intelligence of the particular quality required is among the newspapers, non is shown by a little incident in Toronto, where a very young lieutenant, with a brief newspaper training had a dream which he acted upon at once. He dreamed of a street filled with flags and soldiers in uniform and bugles, which would go out into the highways and byways and scoop the recruits in. He interviewed the street railway inspector next morning and that afternoon the very car he dreamt of was on rails and doing a tremendous business. A few practical dreams like that would soon put the militia department out of its long sleep.

Another point for the recruiting movement seems to have overlooked, is that the recruits won't come to you. If you want them you must go out and get them. The cherry that isn't worth reaching for isn't worth picking. It is not enough to open an office and hold down an arm chair and wait for the recruits to come in and sign the roll. A bearded sergeant outside the railway bridge comes to the door and does good work too—for youth is ever caught by sound and color—but more active measures than that need to be taken. The army of one hundred and fifty thousand men is a long way from strength. The recruiting officer must get out and circulate, if he would reach the football and hockey heroes that are the backbone of the militia. It is not enough to open an office and wait for the recruits to come in and sign the roll. A bearded sergeant outside the railway bridge comes to the door and does good work too—for youth is ever caught by sound and color—but more active measures than that need to be taken. It is not enough to open an office and wait for the recruits to come in and sign the roll. A bearded sergeant outside the railway bridge comes to the door and does good work too—for youth is ever caught by sound and color—but more active measures than that need to be taken. The army of one hundred and fifty thousand men is a long way from strength. The recruiting officer must get out and circulate, if he would reach the football and hockey heroes that are the backbone of the militia. It is not enough to open an office and wait for the recruits to come in and sign the roll. Never despise a mistake when it's done.

Show not sublimity; reality governs wise men.

After a man has apologized what does it amount to.

The perfect husband always belongs to another woman.

When a Clareholm man drinks like a fish his head swims.

Clareholm and district is the land of Fords and can't afford.

Alberta refuses to keep down a good man and bad whisky.

It's surprising how a man can blow his horn when he gets on a toot.

If nobody had too much then everybody might have enough.

It's as difficult to find a friend in Clareholm as it is to lose enemies.

A pessimist is a person who is sick during the entire voyage of life.

Clareholm musicians are no longer able to borrow real money on the notes.

A man isn't necessarily crooked because he is unable to keep his face straight.

It's the man in the overalls, not the man in the dress suit, that the world depends on.

Not many people going to Germany this year to have their voices cultivated.

The shell game is still being played in Europe and recently it was played in Clareholm.

At Winnipeg Miss Annie Short has married William Long. This is the long and short of it.

In Alberta they say strong salt water will revive an unconscious person quicker than brandy or whisky. Oh, what a difference in the morning.

From what a man thinks he knows, subtract what his neighbors think he knows, and the remainder will probably be about what he really does know.

Our dear old mothers used to do most of their turkey trotting when chasing the cows around the barn yard straw track at the witching hour of milking time.

The ministers at Los Angeles, California, are discussing the question: "Where are the dead?" The Times of that city, replies that they can be found in the business places that do not advertise.

The good old days when a man drove a horse with one arm and supported a dainty bit of calico with the other are only memories of middle-aged couples. The present generation only imagines it is enjoying itself.

In the examination of the lower departments of our school a youngster was asked to give the divisions of North America and with an air of triumph replied Republicans, Democrats and Prohibitionists. Give him a medal.

A queen bee lays from two to three thousand eggs in twenty-four hours. The man who will discover how to cross a queen with a hen, will soon have money enough to buy an automobile for himself and all his poor relatives.

An advertisement is to a merchant what a seed is to a farmer. It may take a little time for the results to become apparent, but they are sure to come. The wise farmer is not negligent with his seed nor the wise merchant with his advertisements.

Some men will eat a good meal at home, of their wives' cooking, and arise from the table without a word of praise for the potter little woman who did the cooking, yet when the same fellows get a burnt meal with cold soup called coffee at a restaurant, they pay their bill cheerfully and tip the waiter (female) handsomely, and smiling at the time.

Consider the power in a ten dollar bill when it is spent at home. It is like magic. It circulates. It pays of a hundred obligations. It creates business and puts people to work in our community. But the ten dollar bill is sent away to the out-of-town house does nothing for our town. It becomes dead to us. It is out of commission forever as far as our town is concerned. We never see it again. Let us, then, give power to the money we spend. Let us remember that our best investment is that money power we spend at home.

Mrs. Pankhurst did more to get votes for women by her speech the other day at the Woman's Social and Political Club than all the longer stiches she had ever known.

It is a pity that a woman who is so successful in her work as a woman should be so unsuccessful in her work as a woman.

Somebody should, "Vote for women." The next time you are out and all that is in your mind is that phrase are at stake in the town. If we lose, not only will we lose for women's suffrage, but we lose for men, also, the "right of the past." Mrs. Pankhurst should be put on the magnificent staff of Lloyd George.

LOCALS

W. G. Moffatt was in Calgary Friday.

S. L. Fraser was a Lethbridge visitor over Sunday.

T. C. Milnes spent last Friday in Calgary on business.

The Clareholm Public School will open on Monday, August 23.

Thos. Guy returned Saturday after a week's holidays in the Hills.

Chas. Romain was a business visitor in Calgary the first part of the week.

Mrs. R. M. Larkin was among the Clareholm visitors on Thursday last.

J. A. Davison, of Calgary, was a Clareholm visitor on Friday of last week.

Grant Clark returned Friday evening after spending a few weeks at Banff.

Miss Hazel Rogers spent Sunday with her sister, Mrs. T. E. Chilton, east of town.

Miss Mina Lepard, of Grain Belt, is spending the week with Miss Hazel Rogers.

S. Dawson, manager of the "Dominion Bank, High River, spent Sunday with friends in town.

On Saturday evening the lightning struck the granary on the farm of N. J. Chilton east of town.

H. Simpson, of Calgary, spent Sunday with his brother George Simpson, of this place.

Mrs. W. M. Ross and son returned Monday after spending the past week with friends in Calgary.

H. B. Scott, B. S. A. of Vermilion arrived here last week to take up his duties at the School of Agriculture.

Miss J. Simpson, of High River, has been spending part of the week with Mr. and Mrs. A. E. Thompson.

Attend the Fair Dance to be given in the L. O. O. F. Hall immediately after the show tomorrow night.

Mrs. C. W. Miller and son Jarvis returned Monday, after spending a few weeks with relatives at Ponkult.

A number of Clareholmites attended the Vidua Stampede yesterday, and all report it to be a grand success.

Mr. and Mrs. J. A. E. of Calgary, spent a few days the first part of the week with Mr. and Mrs. J. E. Moffatt.

G. M. Gledhill and family, accompanied by Frederick William, R. Watkins took a motor trip to Macleod Sunday.

O. S. Longman, of the School of Agriculture has been out near Teber the past week judging the field crop competition.

There has been a number of our townsmen who have been taking advantage of the fishing in the Hills the past week.

Miss B. Price is leaving today for Calgary, where she is entering the General Hospital and taking a nurse's training course.

Considerable damage was done by lightning near Grainau last Saturday evening. Just to whose place was hit we have not learned.

T. Ross, of Vancouver, formerly of the Dominion Bank staff here was in town a few days the latter part of last week renewing old acquaintances.

There is a rumor floating around town that Dr. G. R. Brewster, Veterinarian Surgeon is returning here shortly to open up an office here again.

Staff-Major Lyndon and Lieut. T. Murray of the 18th C. M. R., Calgary, returned from Saturday and spent the first part of the week with their families here.

The demonstrators for the Overland Express are showing the good points of his machine in this city this week. Whether so made any cars or not we were unable to learn.

James P. Briggs, of Macleod, came to Clareholm by motor car Saturday afternoon and after spending a few hours here with friends returned on the evening train.

Mrs. R. M. Larkin spent a couple of days with her sister, Mrs. T. E. Chilton, who recently went to Vancouver on a question but is returning as rapidly as can be expected.

Church of Eng and services will be held next Sunday in St. John's.

Church as follows: Morning Prayer at 11 a. m. Evensong and Service at 7:30 p. m. All are cordially invited.

Dr. M. Mecklenburg, the reliable, reputable, responsible and experienced optician will again be at the Queen's Hotel, Clareholm, on Friday August 24. Eyes properly examined. Fees moderate. 8-123

Charles W. Campbell, Chiropractor, from Norton, will be at O. J. Amundsen's office Railway street on Monday and Friday of each week from 2 to 5 o'clock p. m.

Mr. and Mrs. B. Nelson left for Lethbridge, last Thursday, where Mrs. Nelson, who has been suffering with cancer, expects to receive a medical treatment. They were accompanied as far as Calgary by O. J. Amundsen.

There will be a garden party at the home of Mr. and Mrs. T. C. Milnes, on Saturday evening, August 14, at 8 o'clock, under the auspices of the Protestant Ladies Aid. Refreshments will be served and everyone is invited to attend.

O. S. Longman, who has been instructor in farm mechanics at the Clareholm School of Agriculture for the past two years, has been elected agronomist at the Olds Agricultural school and will leave shortly to assume his duties there.

Mrs. R. M. Larkin received this week word from Mr. Larkin, who is a member of the band with the 31st Battalion, at Shorncliffe, that the band will not go to the front but instead will be detailed to the base hospital, for hospital and musical duties only.

One of our local farmers who is erecting a new house, about holds the record for an inexperienced man in the shingling line. We have heard the report that he and a helper tackled to ten thousand shingles in one of the hottest afternoons last week. Some shingling this!

Geo. Rounds, who has been spending the past six months in California on account of his lesion, returned Monday for a short visit with his sister, Mrs. J. A. Mitchell. Mr. Rounds is looking much better and says he is feeling fine of which his friends are pleased to learn.

Mrs. R. M. Larkin entertained a few friends on Tuesday evening of last week to a theatre party. After enjoying the sixth episode of the "Black Box" they returned to Mrs. Larkin's apartments, where luncheon was served and the remainder of the evening was spent in study making, music and song. Those present were the Messrs. Shind, Noble, Rogers, K. and B. Miller.

Rev. H. M. Henderson has received communication from the officers' training course, in London, stating the death of properly trained men to be up to one hundred in the army.

Anyone thinking of joining the ranks and who believes himself capable of handling a commissioned officer, if he will get in touch with the army, will be put in communication with the proper authorities.

On Thursday next the Patriotic and Relief Fund Society are giving a grand garden fete, at the home of Mr. and Mrs. J. T. Kingsley. Admission will be twenty-five cents, which will include an excellent programme and refreshments. Besides the regular refreshments there will be booths where you can get ice cream and other good things not included in the regular bill-of-fare. Everybody come.

Mrs. J. L. Edlund received a few snap shots yesterday of Mr. Edlund's new patent lighter. It can be understood that Mr. Edlund is in New York where with O. L. Reinecke demonstrating his late invention and by the views of the photographs and the letter he wrote Mrs. Edlund everything as yet seems to be turning out prosperous. Further particulars regarding this marvelous and novel invention will be published at a later date.

Church of England services were held at All Saints Church on Sunday last by the Rev. H. M. Henderson. At the services in the afternoon Mrs. Henderson was supported by her sons Ernest and Alexander, sons of Mr. and Mrs. W. H. Watt, of Canora, Dorothy, Ruth Hebra and Alice Maude, daughters of Mr. and Mrs. S. J. Fisher, of Gravenhurst, and Dorothy Jean, daughter of Mr. and Mrs. Percy A. Smith, postmaster, Gravenhurst.

UNION BANK OF CANADA

When will You Save If you don't Save NOW?

Though your salary or income will no doubt increase, so will your expenses—and many find that the latter more than keep pace with the former. Now is the time to start a Reserve Fund—and the Savings Department of the Union Bank of Canada is the place to keep it.

Deposit the extra you have on hand now—you can open an account with any sum, down to one dollar—and draw interest on it.

Rev. George Kerby, B. A., D. D.

ANNOUNCEMENT

The following prices Cash, Ford, Ontario, effective August 2, 1915

FORD RUNABOUT	\$480.00
FORD TOURING CAR	\$530.00
FORD TOWN CAR	\$780.00

No Speedometer included in this year's equipment, otherwise cars fully equipped.

There can be no assurance given as to any advance in these prices at any time. We must, however, state that there will be no reduction in these prices prior to August 1, 1916.

Profit-Sharing with Retail Buyers

On August 1, 1914 we made the announcement that if we could make and sell at retail 50,000 Ford cars between August 1, 1914 and August 1, 1915 we would share profits with the retail purchasers. We have sold only 18,144 Ford cars in the time specified and, therefore are unable to share our profits with those who purchased Ford cars during the above dates.

We are able to share our profits with retail purchasers of Ford cars between 1914 and 1915 was not successful due to conditions which we could not possibly foresee at the time we made our announcement last August. The war and the consequent unsettled conditions of business seriously affected our sales and increased our manufacturing costs so that during last year we did not meet our required goal, and therefore are unable to share our profits with those who purchased Ford cars during the above dates.

However we still have confidence in our profit sharing plan, but a realization of the same must wait until the general market is able to defer any announcement of future profit-sharing until a later date.

We are, however, positive we cannot reduce costs for several months and therefore can offer no profit-sharing for cars delivered during August, September and October, 1915.

Be sure and see our new line of working Shoes in black and tan. Price \$4.00 and \$4.50. Guaranteed solid leather.

I have a few more ladies' Oxfords and pumps on hand. Regular price \$4.00 and \$4.50. Your choice at \$2.50.

Yours for business,

Carl J. Braren

La Salle Musical Comedy Company at the Opera House

The La Salle musical comedy company, which has for the past few weeks provided a class of entertainment in Calgary that is rarely equaled any place, open up a two night stand at the local opera house tonight with "The Matinee Girl" which was for five years a stand-out musical success in the United States, where it won for its author, Mr. William Gross, who will be seen in the leading male role, much fame and popularity. "The Matinee Girl" promises to be a most enjoyable evening's entertainment. Notable among the repertoire of songs which will be heard are: "Indian Love Song", "My Girl", "Sweetheart", "Chateau", "Love", "The Panama Pacific France", and "Parisian Frappe". There are two scenes in this piece, one played in a park and the other in a hotel, and the scenery which has been prepared for these will be pleasing.

Tomorrow (Friday) night they will give the most amusing play "Facinating Flora". All the principals are direct from Chicago and possess talents unlimited, appearing to exceptional good advantage.

Southern Alberta Farmer Invents a Grain Cleaner

D. L. Mudman, a farmer of Macleod district, has invented a grain cleaner and grader, which, when in general use, will solve the present difficulty of cleaning grain in a general way at a minimum cost to the farmer. The cleaner referred to is styled The Universal Grain Cleaner and Grader and is worked in conjunction with a threshing machine, allowing the grain to be shipped direct from the thrasher absolutely free from all seeds and foreign grain. This cleaner can be run either by its own power or the power of the thrasher. If run by its own power it is by three H. P. Gasoline Engine, mounted on the lower frame of the cleaner. It is by the thrasher the power is obtained by placing a pulley on the outer end of the blower shaft of the separator. The cleaner is so constructed that it can be worked in any angle to the wind, either with it against it, or sideways. The operator has access to the screens while the machine is in motion, thereby being able to keep the machine clean without either stopping or removing the straw and making it possible to work in conjunction with a threshing machine. Mr. Mudman has a full sized model of his cleaner, which will be working in his district as soon as the threshing season starts. Mr. Mudman has received a Canadian patent for his cleaner and also has a United States patent pending.

This certainly will be another boost for Southern Alberta, and goes to show that besides the natural resources of this country we have some real inventors at work.

Advise Farmers Not to Rush Grain to Market

At a conference of bankers, merchants, implement and lumber dealers held under the auspices of the Lethbridge board of trade recently to discuss the best way of handling the immense grain crop now in prospect, a resolution was adopted suggesting to the farmers that they stock some of their grain. This will have a tendency to reduce the rush of the harvest season somewhat, and it is believed will result in greater returns to the farmers.

Bulletin on Swine Raising

The second edition of Bulletin No. 17 of the Federal live stock branch, entitled Swine Husbandry in Canada, has been issued, and may be had on application to the Education Branch of the Department of Agriculture at Ottawa. The interest in Swine Raising stimulated, no doubt by the high values of pork products, made such a demand for information on this subject that the first edition printed last year was quickly exhausted.

This edition brings up to date Statistics with respect to pedigree registration and the trade in hog products. It is shown that the total exports for the fiscal year ending March 31st, 1915 amounted to 169,048,516 lbs. as against 21,561,140 lbs. the previous year. This bulletin covers the whole field of swine raising giving the results of official experiments as well as

the practices of successful farmer swine raisers. An interesting section describes the system of feeding hogs in Denmark where combinations of food are prepared according to their food units in which one pound of grain, wheat, barley, peas, corn, etc., constitute one food unit which is equal to 8 lb. mangels, 4 lb. boiled potatoes, 5 lb. alfalfa, 6 lb. skim milk or 12 lb. whey. It is shown that the diet is varied in a definite way for pigs of different ages.

JUDGES APPOINTED

On account of the excursions coming into Clareholm, and other work at the School of Agriculture, rendering it impossible for the staff to attend the Agricultural exhibitions, and look after this department of the extension work, throughout this district, the past week, W. J. Stephen appointed the following substitutes, who have been giving good satisfaction. L. A. Parry at Empress and Nativity, judging the grain crop competition. Mrs. B. F. Steves was the judge of home products and O. S. Logman judged grains, grasses and vegetables at the Grain Fair. J. G. Smith was the judge of light horses, and Clarence Carney, a graduate of the School of Agriculture judged the dairy products at the Stately exhibition.

Engineer Desires Position

Thoroughly competent Gasoline Engineer, with diploma, desires position on engine during threshing season. Can furnish references if necessary. H. C. R. Write P. O. 56, care of Review. 7-22-3

Hills Breezes

(Received too late for last week)

Wm. Furman returned to town again a few days ago.

W. G. Smith of Mount Royal is quite a regular caller to Graman of late.

James Bailey has returned to the Hills again and is working for A. E. Fletcher.

O. Wallen from the Flats was in the Hills for a few days looking for horses that had strayed from his place.

Percy Smith when he was out made arrangements of putting up a new set of slings in the new barn which he is to build at Lonely Valley.

The postponed picnic of the Robertson Church took place on Friday, July 23, but came on rain and hail and they took refuge in the house of Geo. Fletcher where they had their lunch and furnished the social with music with games and had a race which Mrs. Geo. Fletcher won by a good margin.

THIS RUMMY WORLD

The longer I live the more I discern that this world of ours is a darn queer concern. It's a crime to pick pockets, but it's perfectly right to pick a man's wages on Saturday night for the laws are constructed wherever I've been, that the workers are made for the gratifiers of skin. If you try to be honest you don't stand a chance; you are sure to be known by the patch on your pants. If you steal a few millions you are a person of note; if you steal a ham bone the police get your goat. If you run around naked, you're sent to the pen; if you swindle some old clothing you go there again. If you murder in war, then your valor is sung; if you privately murder you're doomed to be hung. If a girl sells her virtue she's branded as vile, but the rooster that bought it is met with a smile. If a man tells the truth, then the people get tired; if he tells them a myth, why they say he is inspired. It's a funny old world wherever you turn; it's a devilish twisted and darn queer concern; it's badly balled up and it's all out of tune, and must be a sight to the men in the moon.

We have a few fashion plates left in Clareholm but it is not the flashy thing you see in the white socks who is quick as lightning.

A Singular Marriage Feast

Polynesian is probably the only place in the world where the marriage feast takes place without the presence of the bridegroom. For some unexplained reason the young man is "sent into the bush" when the bride becomes a member of his family, and he invariably remains there during the subsequent festivities. It is only when the guests have departed and the girl is left alone with her parents that messengers are dispatched for him.

Mr. Farmer! Are You Ready?

Harvest is at hand. Are you ready for it? "Do not put off till tomorrow what should be done today."

We give Services with Our Sales.

Ask Your Neighbor. We handle a Standard Line of Paints. Also all kinds of preserving fruit in Season. Best B. C. Fruit. Please call and get our prices.

BUTTER AND EGGS WANTED

BUTTER WRAPPERS

Must Be Printed or Branded
According to New Dairy Act

Our facilities for the printing of Butter Wrappers are equal to any found in the province. In prices, considering the quality, we are the lowest. Unless the cheaper grades are desired our prices are always for wrappers made of the best grade vegetable parchment paper, printed with Special Brine Proof, Non-poisonous Butter Wrapper Ink. We can supply the cheaper and imitation grades but we do not recommend them because they do not give the best satisfaction.

Gen. Hughes and the Militia Department

(Continued from page 1)

is about to undergo at the front. Such a rule would do away with the rugged parades of new recruits which are now a feature in our titles. As for a regiment or any part of a regiment going abroad un-uniformed, that should never be allowed to happen. Sooner than that the uniforms should be taken from the soldiers who will get others when their turn comes.

The Militia Department will also stimulate recruiting by giving definite assurance that the soldier and his family will be looked after, not only in the way of separation allowances and pensions, as by law provided, but also in providing for his future as a useful working member of the community, if he is not permanently and totally disabled. Some scheme of vocational training should be already adopted. Members of Parliament can state as Mr. Rhodes has already done that a man with one arm can keep a light house as well as a man with two arms, and that other things being equal, their patronage in regard to government jobs will go to the soldier who has done his bit rather than to the office hunter who has remained at home. It goes without saying that the veterans will be entitled to land scrip, as were the veterans of the much smaller wars, but it would do no harm if such an announcement were made right now. Much has been said to the recruits of their duties. It will help the movement to dwell a little on their rewards.
